

Resolve to **BE READY**

**"Be Disaster Aware,
Take Action to Prepare".**

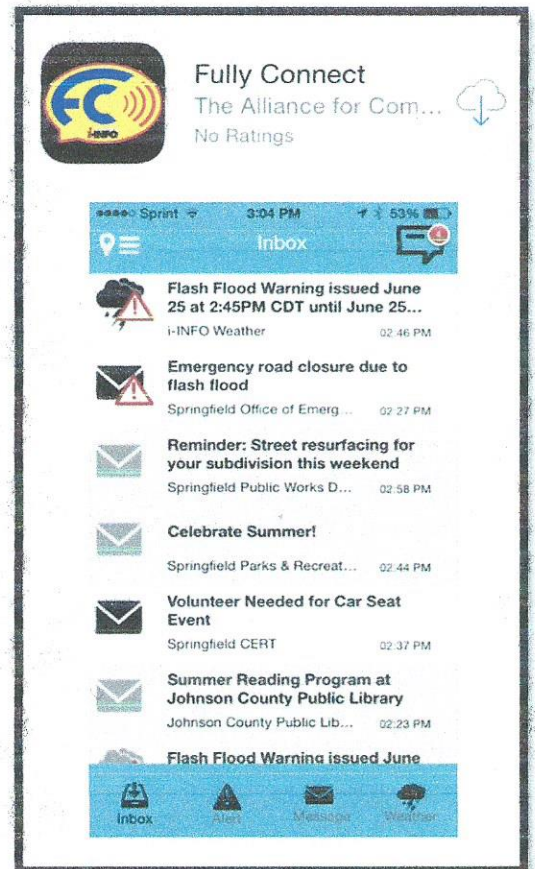

One way you become disaster aware is to connect to Hansford County's public mass notification system. When you do, you'll receive timely weather alerts and warnings so you can *take action* to avoid situations that might place you and your family in harm's way. It just takes two simple steps to begin receiving alerts on your phone, tablet or computer.

First - You register at: www.R2BeReady.com

Next, you can download our new phone app called ***Fully Connect*** to your smart phone. Fully Connect bypasses cell phone servers to help ensure that alerts and warnings can be sent to you more quickly; when time matters most.

- ☎ **For iPhones**, you'll find the app in the Apple app store
- ☎ **For Androids**, you'll find the app in the Google play store

Just search for ***Fully Connect*** It's free and it's designed to let you know when conditions in your area are potentially hazardous.

When it comes to being prepared, knowing is half the battle.
Become Aware!!
